

Carbon Reduction Plan

Supplier name: RVL Group Limited

Publication date: 24 January 2024

Commitment to achieving Net Zero

RVL Group Limited is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2023	
Additional Details relating to the Baseline Emissions calculations.	
This follows the implementation of our Corporate Social Responsibility Policy. The baseline emissions data refers to the emissions produced by RVL Group in the selected baseline year. This is the first reporting period against which future reductions will be measured.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1 (Fuel, business mileage in company vehicles)	149.32
Scope 2 (Electricity, energy)	66.76
Scope 3 (Employee commuting and business travel, air, rail, taxi) (Included Sources)	183.16
Total Emissions	399.24

Current Emissions Reporting

Reporting Year: 2024 (Not yet ready)	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	XX
Scope 2	XX
Scope 3 (Included Sources)	XX
Total Emissions	XX

Carbon Reduction Initiatives

RVL Group is implementing several key initiatives to reduce our carbon footprint:

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

- Committing to neutralising RVL's own emissions from training and positioning flights
- Implementing a new flight planning tool which will optimise fuel efficiency
- A rolling programme of upgrading existing lighting to be more energy efficient
- The introduction of a salary sacrifice scheme, enabling employees to lease hybrid and electric vehicles via a company scheme, along with installation of EV charging points at the business premises
- Implementing a digitisation strategy which will reduce the need for printed documentation

While we have a good understanding of our scope one and two emissions, we are less confident with scope three and will be actively addressing that situation over the coming year.

We project that carbon emissions will decrease over the next five years to 10% tCO₂e by 2028.

By 2050, we aim to achieve Net Zero.

Declaration and Sign-Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance. We confirm that the information provided is accurate and that RVL Group is committed to achieving the carbon reduction goals set out in this document.

Ongoing Monitoring and Reporting

We will review our Carbon Reduction Plan annually and update it as necessary to reflect progress and changes in legislation or business activities. Regular monitoring of emissions data will ensure that we stay on track to achieve our long-term Net Zero target.
